Professional Summary

I'm a Full Stack Web developer located Bursa. I'm still a Computer Engineering student. I very enjoy solving problems and make people's life easier.

Frontend

- I'm currently using **Vue** and For state managment of course **Vuex**. I have also little expresience with **React js**.
- Some times I use pure **css** it's very nice and flexible.And also I use frameworks (**Bootstarp-Tailwind-Vuetify-Buefy-Bulma**) because these tools are easy to use.

Backend

- I'm currently using **Node js** and i still learning another backend techs.
- I have expresience with **passport js** for authentication.

Database

- I'm currently using **NoSql** databases (mostly **MongDb-Firebase**).
- I have also some experience with **Sql** databases.

Now I still learning web technologies. at the same time I create personal and Freelance projects with using the following techs.
